

# Oshtemo Township Citizen Engagement and Priority Survey

---

August 2017

# Measuring Where You Are: Why Research Matters

- Understanding community values and priorities helps you plan and communicate more effectively about Township decisions
- Perception impacts behaviors you care about
- Understanding community perception helps you improve and promote the Township
- Community engagement improves support for difficult decisions
- Reliable data on community priorities aids in balancing demands of vocal minorities with the reality of limited resources
- Bottom line outcome measurement of service and trust: Good administration requires quality measurement and reporting

# Study Goals

- Support budget and strategic planning decisions
- Explore service assumptions to ensure baseline service measures are understood
- Identify which aspects of community provide the greatest leverage on citizens' overall satisfaction
- Discover key outcome behaviors such as recommending the community, remaining in the community, volunteering and encouraging someone to start a business
- Determine support for planning and zoning regulations and future service opportunities

# Methodology

- Random sample of 1,500 residents drawn from voter records
- Utilized [www.random.org](http://www.random.org), a well-respected utility used internationally by many universities and researchers to generate true random numbers
- Conducted using two mailings in May and June 2017
- Valid response from 367 residents (25% response rate), providing a conventional margin of error of +/- 5.1 percent in the raw data (95% confidence)
  - 2013 = 308 responses, 10 volunteers; +/- 5.5% at 95%
  - 2017 = 367 responses, 157 volunteers; +/- 5.1% at 95%
  - Note: National surveys with a margin of error +/- 5% require a sample of 384 responses to reflect a population of 330,000,000
- In addition to the random sample, there were 157 responses from volunteer respondents for a total response of 524

# Implementing Results

# Perception v Reality: Minimize Distortion or Fix Real Performance Issues

## **Perception gap:**

Respondents rated based on a false idea or understanding. Address with communication strategy to change that perception.

## **Real performance issue:**

Address with an improvement plan. When performance improves, it becomes a perception gap to address with a communication strategy.

# Strategy is About Action: Improve Performance to Improve Outcomes

The diagram at the right provides a framework for following up on this survey.

- The first step (measurement) is complete. This measurement helps prioritize resources and create a baseline against which progress can be measured.
- The second step is to use internal teams to further analyze the results and form ideas about why respondents answered as they did and potential actions in response.
- The third step is to validate ideas and potential actions through conversations with residents and line staff – do the ideas and actions make sense. Focus groups, short special-topic surveys and benchmarking are helpful.
- The fourth step is to provide staff with the skills and tools to effectively implement the actions.
- The fifth step is to execute the actions.
- The final step is to re-measure to ensure progress was made and track changes in resident needs.
